

# MAGNETHANE™

## Why switch to MAGNETHANE?

In this era of food safety vigilance, food processors must adhere to increasingly stringent government guidelines. **Keeping foreign material “surprises” out of our food** and food ingredients is one of the industry’s most pressing ambitions.

Sifting and screening equipment utilize exible sleeves on the inlets and outlets. Screen-cleaning devices such as balls are used to clear the screen mesh of near-sized particles. Without exception, these connecting sleeves and screen cleaning devices abrade from contact with the ow of the process materials. Cleaner balls chip and crack from striking against the screen mesh and ball tray.

### *Where do these particles and pieces end up?*

Get better connected with **MAGNETHANE**, a proprietary blend available in USDA / FDA acceptable thermoplastic resins and thermoplastic rubber compounds. In either form, **MAGNETHANE** provides both a very powerful magnetic susceptibility and excellent metal detect-ability.

**The plastic and rubber parts made from MAGNETHANE can be trapped and detected like metal.**

**MAGNETHANE helps to minimize costly product recalls - recalls due to untraceable plastic materials in your food product stream.**

## Clean Air & Good Connections

**MAGNETHANE unlocks the door to the next generation of safety products for your company.**

*Flexible connectors and drop tubes*

- *Screen cleaning devices, Cleaner balls*
- *Conveyor and power transmission belts: flat, V, round profiles*
- *Conveyor belt scrapers*
- *Gaskets: flat and extruded profiles*
- *Bakery de-panner sucker cups*
- *Product guides and "fingers"*
- *Magnethane-additive resin*
- *Custom molded products*

**MAGNETHANE** products make your magnetic traps more effective as well as being visible on most X-ray and metal detection devices.

This will allow you to recognize, and deal with pieces that may have fallen into the product stream. These bits may have gone undetected in your finished goods until it was too late.

**Time to switch to MAGNETHANE.**

**MAGNETHANE helps to minimize costly product recalls - recalls due to untraceable plastic materials in your food product stream.**
